REQUEST FOR PROPOSAL

1. Project Information

1.1 Project Name: Smart City Challenge – ITS Program Management and Program Initialization

1.2 Project Overview:

The required services and deliverables covered under this Request for Proposal relate to planning, programming, program management support and initial set up of the Smart Columbus Program Enabling Technologies and Deployment Districts per the Smart Columbus Plan and the USDOT Smart City Challenge. The vision of the Smart City Challenge is to demonstrate and evaluate over four years a holistic, integrated approach to improving surface transportation performance within a city and integrating this approach with other smart city domains such as public safety, public services, and energy. The USDOT intends for this challenge to address how emerging transportation data, technologies, and applications can not only be integrated with existing systems in a city to address transportation challenges, but also used to spur reinvestment in underserved communities.

The USDOT and Vulcan have made awards of up to \$40 Million and \$10 million, respectively, to the City of Columbus to demonstrate how advanced data and intelligent transportation systems (ITS) technologies and applications can be used to reduce congestion, keep travelers safe, use energy more efficiently, respond to climate change, both connect and create opportunities for underserved communities, and support economic vitality. The USDOT Smart City Demonstration and the Vulcan Electrification Plan are expected to provide safety improvements, enhance mobility, increase ladders of opportunity by incentivizing reinvestment in underserved communities, reduce energy usage, and address climate change in a coordinated and holistic manner.

This Request for Proposal pertains to the services and deliverables needed by the City of Columbus for the planning, programming, program management support and initial set up of the Smart Columbus Program Enabling Technologies and Deployment Districts per the Smart Columbus Plan. Some aspects of the City's Smart Columbus Plan will be performed by an internal, interdepartmental City team or other consultant teams coordinated through the Smart Columbus Program Office. The Consultant will be managed by the Smart Columbus Program Office, which is housed in the Department of Public Service.

The contract with the selected Consultant will have a minimum DBE goal of 15% and will be a general services type, with hourly rates and overhead rates established in the contract. Task orders will be specified, negotiated and issued to the Consultant following the issuance of the Notice to Proceed.

The selected Consultant shall attend a scope meeting anticipated to be held on/about **August 1, 2016**. If the Project Manager is not available, the Consultant may designate an alternate(s) to attend in his/her place.

The Enabling Technologies to be developed under Smart Columbus will consist of the Integrated Data Exchange (IDE), the Columbus Connected Transportation Network (CCTN), Enhanced Human Services (EHS), and Electric Vehicle Infrastructure (which will be coordinated primarily through the City's Vulcan consultant contract with assistance under this contract). The Enabling Technology components will consist of advanced transportation technology, data, web and smartphone app development, and intelligent traffic systems to demonstrate the USDOT Smart City Challenge and Vulcan Electrification Plan.

The projects developed under Smart Columbus in each of the four Deployment Districts will typically be demonstration projects in targeted areas using technology, data, web and smartphone app development, and intelligent traffic systems to demonstrate the USDOT Smart City Challenge in three of the City's four district archetypes for Residential (Linden neighborhood), Logistics (Rickenbacker area), Commercial (Easton), and Downtown.

Non-standard project specifications and plan formats may be used for some deployment projects where there is no apparent benefit from developing standard construction drawings. The selected Consultant shall be readily available to perform such tasks when requested by the City. Services on request and detailed scopes for individual deployment projects will be developed as requested and work will be authorized as individual scopes are developed. Re: Utilizing Environmentally Preferable Requirements in
RFP/RFSQ Contracts

This policy regarding how City Agencies should utilize the environmental preference in professional service contracts is issued pursuant to the authority granted to me by Columbus City Code 329.03,

As part of Mayor Coleman's Get Green Columbus initiative, City Council added section 329.31 to the Columbus City Code. This section provides, in part, that City agencies will develop specifications to encourage environmentally preferable bidders and offerors. In addition, it states that when evaluating bids or offers for materials, supplies, equipment, construction and services, preference will be given to an environmentally preferable bidder or offeror.

The purpose of this memo is to address how this section should be implemented when a Department is seeking professional services through a request for proposals (RFP) or a request for statement of qualifications (RFSQ).

When issuing a RFP or RFSQ, these guidelines should be followed.

1. The RFP or RFSQ should include an environmental preference unless it is clear that there is not an environmentally preferable way to carry out the purpose of the contract. If a department determines that there is not an environmentally preferable way to carry out the purpose of the contract, that decision should be shared with the Mayor's Environmental Steward.

2. When drafting an RFP or RFSQ that includes an environmental preference, the RFP or RFSQ should include the following statement (or words to this effect): **The City of Columbus is seeking an Environmentally Preferable Offeror, who will assist the City by providing services that will have a lesser or reduced effect on human health and the environment.**
 3. Each department may determine for itself how to award points for an environmentally preferable bidder. Two areas that should be evaluated for inclusion are points for the team's credentials/experience and/or points for the project proposal. These are discussed further below.
 - a. **Team Credentials:** A department may choose to award points for the specific environmental experience and/or training of the offeror. For example, points may be awarded for LEED certification. In doing so, the department should focus on the team that will be providing the actual services, and avoid awarding points for firm members that will not be directly involved in the project.
 - b. **Project Proposal:** A department may choose to award points for environmentally progressive elements in the offeror's project proposal. For example, points may be awarded for a proposal that suggests using recycled or renewable raw materials.
 4. It is imperative that once a department determines how to award environmentally preferable points in evaluating an RFP or RFSQ that the department is explicit and clear about how those points will be awarded. Specific examples or guidelines should be provided.
 5. Each department should track how many service contracts it has awarded to an environmentally preferable offeror. This information should be reported on an annual basis to the Department of Finance and Management and to the Mayor's Environmental Steward.
